"At Cost" Recordation of Assignments and Related Transactions

Background

The Patent and Trademark Office (PTO) offers "expedited local service" for three well-defined products: patent and trademark copies; certified copies of both patent and trademark applications-as-filed; and certified copies of trademark registrations (status and title). Customers can routinely order these expedited services which are specifically identified by separate codes in the Office's fee schedule. The Office's fee schedule does not specifically provide for other expedited service relating to delivery of documents or other products, largely because of the uncertainty and risk involved in promising services for which either the media/papers to satisfy the order or PTO staff support might not be available.

"At Cost" Services for Recording Assignments and Related Transactions

Assignments are processed and recorded on a "first in/first out" basis from the date of receipt in the Assignment Division. While PTO does not routinely and specifically offer expedited service to record assignments, it has recognized that there are situations, such as pending litigation or commercial transactions, which require other than "first in/first out" processing in order to meet a most urgent judicial or contractual deadline. Accordingly, the Office of Public Records (OPR) practice has been to receive and process these requests on a case-by case basis and to assess fees based on the statutory recordation fee (481,482, 581), plus a combination of "Labor Services" (484, 584) and "Other Services at Cost" (485,585). This has been referred to commonly as "at cost" recordation.

Turnaround time for this extraordinary recordation service is dependent on the scope and complexity of the specific request, staff resources which can be diverted, and other priority work in inventory. While every effort will be made to assist all customers, the PTO cannot always guarantee delivery of recorded documents on or before requested dates.

Requests for "at cost recordation" must be hand delivered or sent via overnight courier *directly* to OPR in the North Tower Building:

U.S. Patent and Trademark Office
Office of Public Records
ATTN: "At Cost" Recordation Services
2800 Crystal Drive, 10th Floor Service Counter
Arlington, VA 22202

Do not send requests to the general PTO address; such requests may be significantly delayed before delivery to OPR.

All documents submitted for "at cost" recordation must meet the minimum requirements set forth in 37 CFR Part 3. In addition, there must be a separate letter specifically requesting "at cost" recordation, signed by a principal party to the transaction (owner, inventor) or the attorney of record, stating the specific date the recordation notice must be returned, and describing the reason special service is required. Detailed justification/disclosure of commercial or confidential business information is not required, but there must be a clear urgency in the request.

Based on their review of the specific request, Assignment Division staff will contact the customer to discuss the feasibility of meeting the deadline and the total cost involved. The minimum charge for expedited assignment recordation is $90 (3 hours labor at $30 per hour), plus the established statutory fee per property. Customers will be contacted and asked to approve all charges before work begins. Customers sending requests via overnight delivery services must make payment via PTO deposit account, MasterCard, or Visa. Local "walk up" customers may pay cash at the PTO Office of Finance Cashier in addition to the other methods.

Once recorded, "at cost" assignments must either be picked up/signed for at the Office of Public Records NT Service Counter or sent via Federal Express (next business day service); charges for Federal Express delivery will be added to the total "at cost" bill.

Questions concerning "at cost" recordation services should be directed to the Assignment Division Customer Services Desk at (703) 308-9723.

In a notice of proposed rulemaking entitled "Changes to Implement 18-Month Publication of Patent Applications," published in the *Federal Register* at 60 FR 42352 (August 15, 1995), and in the *Official Gazette of the Patent and Trademark Office* at 1177 Off. Gaz. Pat. Office 61 (August 15, 1995), the PTO proposed to increase the filing, issue, and each maintenance fee by $30 to recover the cost of 18-month publication of patent applications. In the event that legislation providing for the 18-month publication of patent applications is enacted, the PTO may further increase the filing, issue, and each maintenance fee to recover the cost of 18-month publication of patent applications in the final rulemaking to implement such legislation.

BACKGROUND:

Statutory Provisions

Patent fees are authorized by 35 U.S.C. 41 and 35 U.S.C. 376. A fifty percent reduction in the fees paid under 35 U.S.C. 41(a) and (b) by independent inventors, small business concerns, and nonprofit organizations who meet prescribed definitions is required by 35 U.S.C. 41(h).

Subsection 41(f) of title 35, United States Code, provides that fees established under 35 U.S.C. 41(a) and (b) may be adjusted on October 1, 1992, and every year thereafter, to reflect fluctuations in the Consumer Price Index (CPI) over the previous twelve months.

Section 10101 of the Omnibus Budget Reconciliation Act of 1990 (amended by section 8001 of Public Law 103-66) provides that there shall be a surcharge on all fees established under 35 U.S.C. 41(a) and (b) to collect $119 million in fiscal year 1998.

Subsection 41(d) of title 35, United States Code, authorizes the Commissioner to establish fees for all other processing, services, or materials related to patents to recover the average cost of providing these services or materials, except for the fees for recording a document affecting title, for each photocopy, and for each black and white copy of a patent.

Section 376 of title 35, United States Code, authorizes the Commissioner to set fees for patent applications filed under the Patent Cooperation Treaty (PCT).

Subsection 41(g) of title 35, United States Code, provides that new fee amounts established by the Commissioner under section 41 may take effect thirty days after notice in the *Federal Register* and the *Official Gazette of the Patent and Trademark Office*.

Section 31 of the Trademark (Lanham) Act of 1946, as amended (15 U.S.C. 1113), authorizes the Commissioner to establish fees for the filing and processing of an application for the registration of a trademark or other mark, and for all other services and materials relating to trademarks and other marks.

Section 31(a) of the Trademark (Lanham) Act of 1946 (15 U.S.C. 1113(a)), as amended, allows trademark fees to be adjusted once each year to reflect, in the aggregate, any fluctuations during the preceding twelve months in the CPI.

Section 31 also allows new trademark fee amounts to take effect thirty days after notice in the *Federal Register* and the *Official Gazette of the Patent and Trademark Office*.

Recovery Level Determinations

This proposed rule adjusts patent fees for a planned recovery of $763,391,000 in fiscal year 1998, as proposed in the Administration's budget request to the Congress.

The patent statutory fees established by 35 U.S.C. 41(a) and (b) are proposed to be adjusted on October 1, 1997, to reflect any fluctuations occurring during the previous twelve months in the Consumer Price Index for all urban consumers (CPI-U). In calculating these fluctuations, the Office of Management and Budget (OMB) has determined that the PTO should use CPI-U data as determined by the Secretary of Labor. However, the Department of Labor does not make public the CPI-U until approximately twenty-one days after the end of the month being calculated. Therefore, the latest CPI-U information available is for the month of February 1997. In accordance with previous rulemaking methodology, the PTO uses the Administration's projected CPI-U for the twelve-month period ending September 30, 1997, which is 2.6 percent. Based on this projection, patent statutory fees are proposed to be adjusted by 2.6 percent. Before the final fee schedule is published, the fees may be adjusted slightly based on updated data available from the Department of Labor.

Certain non-statutory patent processing fees established under 35 U.S.C. 41(d) and PCT processing fees established under 35 U.S.C. 376 are proposed to be adjusted to recover their estimated average costs in fiscal year 1998.

Three patent service fees that are set by statute will not be adjusted. The three fees that are not being adjusted are assignment recording fees, printed patent copy fees and photocopy charge fees.

Certain trademark service fees established under 15 U.S.C. 1113 are proposed to be adjusted to recover their estimated average costs in fiscal year 1998.

The proposed fee amounts were rounded by applying standard arithmetic rules so that the amounts rounded would be convenient to the user. Fees of $100 or more were rounded to the nearest $10. Fees between $2 and $99 were rounded to an even number so that any comparable small entity fee would be a whole number.

Workload Projections

Determination of workload varies by fee. Principal workload projection techniques are as follows:

Patent application workloads are projected from statistical regression models using recent application filing trends. Patent issues are projected from an in-house patent production model and reflect examiner production achievements and goals. Patent maintenance fee workloads utilize patents issued 3.5, 7.5 and 11.5 years prior to payment and assume payment rates of 78 percent, 54 percent and 32 percent, respectively. Service fee workloads follow linear trends from prior years' activities.

General Procedures

Any fee amount that is paid on or after the effective date of the proposed fee increase would be subject to the new fees then in effect. For purposes of determining the amount of the fee to be paid, the date of mailing indicated on a proper Certificate of Mailing or Transmission, where authorized under 37 CFR 1.8, will be considered to be the date of receipt in the PTO. A Certificate of Mailing or Transmission under Section 1.8 is not proper for items which are specifically excluded from the provisions of Section 1.8. Section 1.8 should be consulted for those items for which a Certificate of Mailing or Transmission is not proper. Such items include, inter alia, the filing of national and international applications for patents and the filing of trademark applications. However, the provisions of 37 CFR 1.10 relating to filing papers and fees using the "Express Mail" service of the United States Postal Service (USPS) do apply to any paper or fee (including patent and trademark applications) to be filed in the PTO. If an application or fee is filed by "Express Mail" with a date of deposit with the USPS (shown by the "date in" on the "Express Mail" mailing label) which is dated on or after the effective date of the rules, as amended, the amount of the fee to be paid would be the fee established by the amended rules.

In order to ensure clarity in the implementation of the new fees, a discussion of specific sections is set forth below.

Other Considerations

This proposed rulemaking contains no information collection within the meaning of the Paperwork Reduction Act of 1995, 44 U.S:C. 3501 et seq. This proposed rule has been determined to be not significant for purposes of Executive Order 12866. The PTO has determined that this proposed rule change has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that the proposed rule change would not have a significant impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The proposed rule change increases fees to reflect the change in the CPI as authorized by 35 U.S.C. 41(f). Further, the principal impact of the major patent fees has already been taken into account in 35 U.S.C. 41(h), which provides small entities with a fifty percent reduction in the major patent fees.

A comparison of existing and proposed fee amounts is included as an Appendix to this notice of proposed rulemaking.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
